ABSTRACT OF THE DISCLOSURE

A flexible foldable keyboard apparatus ~~comprising~~ includes a flexible foldable keyboard (101) having a key defining plane (102), an interface device and phone supporting device means (103). The phone supporting device means (103) is arranged to unfold from a storage configuration, in which the phone supporting device means (103) is folded onto the key defining plane (102) to allow the key defining plane (102) to be wrapped around the phone supporting device means (103), to present a telephone supporting configuration, in which the phone supporting device means (103) is configured to receive a mobile telephone (401). The phone supporting device means (103) is configured to support a mobile telephone (401) in an orientation in which an electrical connection is provided between ~~said the~~ the interface device and the electrical connectors of ~~said the~~ the mobile telephone (401), such that ~~said the~~ the mobile telephone (401) and ~~said the~~ the flexible foldable keyboard (101) are in electrical communication.
